

Select all unresolved objects in a specified region with cuts on attributes

```
SELECT objectId
FROM Object
WHERE areaSpec_box(:raMin, :declMin, :raMax, :declMax)
      AND extendedParameter < 0.2
      AND gMag-rMag > :grThreshold
      AND (muRa * muRa + muDecl * muDecl) < :properMotionThreshold
      AND redshift BETWEEN :z1 AND :z2
```
